SUPRO 1695T 'black magick'

bias is way too hot

24Vdc/200R = 120mA -> 60mA per 6973

6973 max. dissipation
Pa + Pscr = 12W + 2W = 14W

Imax = P / U_anode = 14W / (364V-24V) -> 41mA per tube
