Marshall JMP Series 1987 and JCM-800 2204

Switchable Dual Preamps
Drawn by Steve Luckey

NOTE 1 Value not critical. Use 33K to 68K.

NOTE 2 JMP series uses .0022uF
JCM-800 series uses .022uF
90's Reissue series uses .022uF

NOTE 3 JMP series uses .005uF
JCM-800 series uses 220pF
90's Reissue series uses .0047uF

NOTE 4 The 0.68uF cap is only present in the JMP 1987 series.

NOTE 5 Alternate Switching. Remove the channel selector switch and put a 470K mixing resistor in the JCM-800 signal path as shown. Replace the single input jack with two separate jacks and use an external A/B switch to select channels.
